iSync™

CUSTOM. DIGITAL. INVISIBLE.

AudioSync»»

100% Invisible. 100% Amazing.

iSync lives in the second bend of the ear for complete invisibility and enhanced audibility.

*The iSync
begins where
the CIC ends.*

Superior Technology. Maximum Performance.

Whereas other deep insertion products utilize dated, analog technology, iSync features the latest multi-core digital signal processing for maximum performance.

iSync™

Comfortable fittings make comfortable patients.

iSync is the first and only deep insertion custom hearing aid providing unmatched comfort for a greater number of patients.

- Leverages proprietary digital modeling and advanced micro-chip packaging techniques to minimize overall size
- Placement in second bend of ear canal combined with venting reduces occlusion issues
- Takes advantage of audio cues from the pinna for natural sound quality

- Includes industry-leading Sound Shield
- Noise Tranquility noise reduction and speech preservation system utilizes dynamic voice identification coupled with a spectral noise control that calculates appropriate gain on a per channel basis providing unprecedented sound quality
- Includes 16 channels and 16 bands for optimal high-resolution sound imaging
- T² Remote function allows patients to adjust volume and memories using a standard touch-tone phone

- Uses AudioSync's proprietary Comfort Fit process which leverages information captured from millions of ears
- Can be inserted and removed by patient to promote better ear health
- Enables more patients to benefit from a deep insertion device than ever before
- Wide fitting range

"I've never had sound quality like this from a hearing aid."

Larry, iSync wearer

"I haven't heard this much in years! I have been asked by a number of people why I'm not wearing aids anymore, these things are invisible."

Mr S. Claridge, iSync wearer
